

10 Warning Signs of Alzheimer's Disease: **Early Detection Matters**

Presented by Jody Addeo, MPH, LNHA, Community Engagement Manager for Rockland and Westchester counties. In her role, she connects with local organizations to increase awareness of Alzheimer's Association programs and services while educating communities on Alzheimer's disease.

Early diagnosis gives people with Alzheimer's disease the chance to make key decisions about treatment, care, and planning, and the power to make choices about their own health and future.

This program increases awareness of the benefits of early Alzheimer's detection and provides information about memory loss and normal aging, Alzheimer's, and other forms of dementia. Also learn about the risk factors, 10 warning signs, the diagnostic process, and resources to help.
